

# Treated Wood Waste

Update for Vendors, Customers, Contractors,  
and Interested Parties

## Resolution

On August 31, 2021, **Assembly Bill 332** was signed by Governor Newsom **reinstating the ability of treated wood** waste producers to bring this waste **to a solid waste landfill**, a permanent fix. The bill takes effect immediately.

**Variations are no longer needed for disposal and transportation.** Most landfills that were accepting treated wood waste prior to January 1, 2021 are once again accepting these items. There is no expiration for the language in the bill.

Please visit the DTSC website for the most current information relative to treated wood waste in California:

<https://dtsc.ca.gov/toxics-in-products/treated-wood-waste/>

The language in AB 332, including how to handle, transport, and dispose of treated wood waste, can be found here:
