

ALLWEATHER WOOD

# SUPERIOR KDAT

## Why Choose Superior KDAT by Allweather Wood?

- Arrows are stamped on each board indicating which direction the board should be installed
- Reduced crowning and joists that crown in opposite directions
- Minimized length and width shrinkage; joists that pull away from the house or other structure can cause expensive callbacks for contractors
- KDAT material is significantly lighter and easier to handle than regular treated lumber, resulting in lower labor and installation costs
- Covered by a \*Limited Six-Month Consumer Warranty

## How Do You Know It's Better?

Low humidity climates in Colorado, New Mexico, and Wyoming present challenges to products used in exterior applications.

Superior KDAT by Allweather Wood starts with high grade lumber selected for appearance and low wane. Graded by a patented, computerized system, Superior KDAT lumber is manufactured to remain consistent and predictable. Each board is stamped with an arrow indicating the direction the board may crown. Build with confidence that joists installed will not crown in opposite directions causing a wavy deck.

*\*Limited Six-Month Consumer Warranty. When properly stored, surfaced, or pressure treated, Weyerhaeuser Treater Series Lumber is warranted by Allweather Wood against warp that would otherwise result in the product not being usable, for a period of six months from the date of the original purchase of the product from the Retail Dealer. For additional information, including Definition of Covered Conditions, please see our Limited Six-Month Consumer Warranty Brochure.*

## Advanced Treatment Technology

Superior KDAT by Allweather Wood is treated with the advanced technology of mCA with BARamine. Unlike standard mCA treatments, the addition of the BARamine preservative gives you better protection with:

- Improved penetration
- More consistent preservative distribution
- Broad moldicide protection
- Better resistance to certain copper-tolerant fungi
